

# Non-Detergent Cleaner

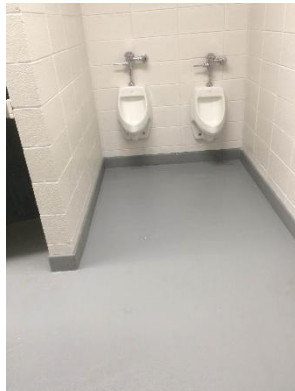

For Daily Use

**Exclusive daily use on floors already cleaned of detergent residues allows them to return to their like-new appearance after each cleaning!**

All detergents leave behind a surfactant residue on floors that holds onto incoming soils and odors. These sticky residues build up over time causing rapid re-soiling and a layering of contaminants that darken the original surfaces.

**Split! Non-Detergent Cleaner** is free rinsing and leaves no residue to accelerate re-soiling. Exclusive use greatly reduces the need for restorative cleanings – saving chemicals, water, sewer, electricity, packaging and labor! No detergent cleaner can do the same.

**Restroom Floors** of all kinds gain the most from detergent free cleaning. Not only are they clean and look new each time they dry, they are also completely odor-free. Imagine odor-free restrooms every day!

**Grouted Floors** including ceramic, marble, slate and more. Daily mopping and auto scrubbing allow even textured tile with grout to return to original colors. Darkening grout is a thing of the past.

**Specialty Floors** such as luxury vinyl planks and tiles, studded and smooth rubber and more. Surface scratches and seams no longer collect detergent residue holding soil, returning no-wax floors to their original beauty!
