

# Split!® Restorative

## Non-Detergent Cleaner

Nonfood Compounds  
A1

### Shocking Cleaning Power!

As the first step to keeping hard floors spotless, **Split! Restorative Cleaner** removes heavy buildups of existing detergent residue. It also cleans previously unmovable soils and stains from all surfaces not harmed by water. Remove stubborn organic stains including grease, oil, animal fats, food and beverage stains, body fluids, road and roofing tar, mold and mildew stains, lotions, makeup, organic odors and more.

NSF listed A1 for use in and around food processing!

#### Tile and Grout

Cleaned of detergent residues, tile and grout returns to its original color and look. Organic odors are eliminated. Exclusive cleanings with **Split!** afterward cause them to dry this way upon each future cleaning!

#### Kitchens and Food Processing

**Split!** Restorative cleaner is an amazing cleaner degreaser for all purposes. Cleans and greatly reduces ATP readings on equipment, countertops, stainless steel, exhaust hoods, quarry tile and grout – even on food contact surfaces.

#### Stainless Steel

**Split!** removes all polish from stainless, causing it to have a higher gloss. Without polish, it holds much fewer fingerprints and less dust. Finally, you can simply spot clean stainless steel!

#### Heavy Duty Industrial

The most powerful cleaner for heavy duty industrial applications. **Split!** is better than butyls at completely removing grease and oil, even years' worth that are baked on! Blows away carbon black, printer's ink, and adhesive residues.

*Must be seen to be believed! Ask your rep for a demo today!*

### Leaves no detergent residue to accelerate re-soiling!

Once surfaces are cleaned of these sticky residues and use of detergents is discontinued, surfaces stay cleaner, longer. Reduce or eliminate restorative cleanings, saving labor, chemical, water and electricity!
